## Proposed Specification General

To construct the proposed peace garden as shown on Drawing number 2090 – 3A.

The garden as constructed is to comply with the details and conditions specified in the permission to Application number 200557.

All materials used must be appropriate for the use and of good quality.

The removal of the excavated material from the site must be done in a responsible way. The planning specification, including trees and the provision of plants is to be agreed with Bromyard and Winslow Town Council before work on the site commences. The quotation for this work is to **INCLUDE** the provision of any plants.

## Schedule of Work

- 1) The grass is to be cut and arisings removed from site.
- 2) Install a self-binding hoggin pathway, as per the attached plan (including area in existing cemetery). To ensure the correct sub-base is prepared to a sufficient depth to allow for free drainage at this riverside location. *(Contractor to provide detailed specification / method statement for this task).*
- 3) As per the plan, the garden areas 1-7 are to be excavated to a minimum depth of 300mm (one spit) and all vegetation and root material is to be removed and disposed of. The spoil is to be mixed with compost and fertilizer to provide a suitable growing medium for the planting.
- 4) The previously excavated spoil to the road end of the site is to be removed from the site at the same time as the material in item (2) above.
- 5) Provision and planting of low maintenance shrubs in the newly created flowerbeds.
- 6) Fix only the benches as shown and provided by Bromyard and Winslow Town Council in an agreed manner to deter their removal by others.
- 7) Excavate suitably sized pits to the road elevation of the site and plant up to 5 native trees as specified by Bromyard and Winslow Town Council.
- 8) Make good any damaged or substandard areas of grass by weeding, turning over and compacting the ground in the agreed areas, to include the provision of additional growing medium as required and the supplying and laying of turf for the provisional sum of approximately £250.00.
- 9) Make good all areas and remove all rubbish from site on the completion of this work.
